## Work Experience

---

### Netware Innovative Labs

Frontend Developer | Remote

Apr 2024 – present

- Contributed to translating high-fidelity Figma designs into functional and accessible user interfaces by collaborating with the Frontend Lead UI designer using React, TailwindCSS and MUI, ensuring a consistent and enjoyable user interface across the application.
- Collaborated with the Frontend Lead to create reusable components using React & Typescript, cutting development time by 15%.
- Implemented Redux Toolkit to streamline global state management in the [Reydesk help desk application](#), improving data handling efficiency.
- Integrated external APIs to enable key features and enhance user functionality.
- Participated in weekly team demos to share updates, address challenges, and receive feedbacks, driving continuous improvement and ensuring timely task completion.
- Collaborated effectively with the Frontend Lead using Git and GitHub for version control to enhance teamwork and streamline development workflows.

### Huygensoft Limited

Frontend developer | Remote

Oct 2022 – Jan 2024

- Successfully translated high-fidelity Figma designs into functional and accessible user interfaces, improving user satisfaction and engagement.
- Developed several projects using HTML, CSS, Bootstrap, SASS and JS.
- Built reusable and accessible user interface components with React, Material UI

(MUI) & styled components for maintainability and scalability.

- Integrated Redux Toolkit/Context API for efficient global management of data across the code, ensuring proper separation of concerns within the application.
- Interact with backend APIs from the front end using React-query (Tanstack).
- Leveraged Git and GitHub for version control to enhance teamwork and streamline development workflows. (add firebase too)
- Engage in weekly demo sessions to iron out issues and present tasks assigned.

## Zuri HngX Internship

Internship | Remote

Sept 2023

- Participated and completed tasks given.
- Worked with a backend developer to develop a Chrome extension "HelpMeOut."

Tools: HTML, CSS, JavaScript (React), MUI, Git, GitHub, Fetch API, APIs, Vercel.

## Projects

---

1. [LeCadance e-commerce application](#)
2. Cy-cycle real estate CRM

## Licenses & Certifications

---

[Enterprise Design Thinking Practitioner](#) (IBM)

[React Development](#) (Shecodes)

Backend Development (Shecode Africa Academy x Fedx) cohort 1

## Education

---

**National University of Nigeria** (BSc Computer Science)

2018–Present
